

THE 10 THINGS YOU NEED TO KNOW ABOUT TAROT

The Soul's Coach
own your journey

- 1 **Tarot is not fortune-telling.**
Fortune telling is predicting information about a person's life.
- 2 **Tarot does not predict, it simply provides information that you can use to make informed decisions. The future is not set in stone.**
Free will is a thing. Although Tarot lays out the energies for you to work with, ultimately, the decision to act or not is yours and yours alone.
- 3 **Tarot is part of a divination system called cartomancy.**
Cartomancy is using cards to divine the energies around you. It also includes other types of decks such as Lenormand, Kipper and you can also use regular playing cards!
- 4 **Anyone can learn to read Tarot cards.**
You don't need to be psychic or even spiritual. There is a meaning to each card that can be learned and a system of reading that can be developed. You do need to believe that you can do it but that is all that is required.
- 5 **You can absolutely purchase your own Tarot deck.**
There is a superstition out there that you can't buy your own deck, that it must be gifted to you. If this were true, I wouldn't own any decks.:) It is not bad luck to purchase your own Tarot deck and can be very important in choosing a deck that you can connect with and relate to.
- 6 **Tarot is divided into two main sections, the first portion of the deck is the Minor Arcana.**
The Minor Arcana represents your day to day life. Working with this portion of the deck will show you the people and situations that are prevalent in your life at that moment. This covers topics such as work, finances, love, and creativity.
- 7 **The second portion of the Tarot deck is The Major Arcana and it represents the Soul lessons in your life.**
-Working with this portion of the deck shows you the larger "life lessons" that you are experiencing. They can represent, among other things, change, rebirth, balance, and discipline.

8 **There aren't any "bad" Tarot cards.**

-Cards that are considered "dark" or "negative" often represent much-needed change. Life is full of ups and downs and Tarot just reflects that back to us in images we can easily understand.

9 **You can always find a Tarot deck to match your interests and beliefs!**

Rider Waite is a patriarchal, Caucasian deck that not everyone can relate to. Although the imagery is universal and it is the gold standard for learning, you might want to find a Tarot deck that you can connect with. There are so many to choose from, The Witch's Tarot, Zombie, Alice in Wonderland, Spiritsong, Pride, LightSeer's, Marseille, Thoth. You really can find any deck to suit your preferences.

10 **Your intuition will develop as you read and connect with your Tarot cards.**

Although having a strong intuition is not a requirement for reading, you will find that, as you progress in your practice, your intuition will automatically kick in and your readings will flow a little easier.
